For More Information: Steve Aden, Supervising Senior Buyer, 974-2021.

Purchasing Language: Sole Source.

MBE/WBE: This contract will be awarded in compliance with Chapter 2-9C of the City Code (Minority-Owned and Women-Owned Business Enterprise Procurement Program). No subcontracting opportunities were identified; therefore, no goals were established for this procurement.

This contract is for the complete rebuilding/refurbishing of three Ashbrook Aqua belt Gravity thickeners for the Hornsby Bend Biosolids Management Plant. This equipment is used to thicken the incoming sludge before it is sent to the digesters for treatment. These machines are critical to the treatment process of the sludge and have been in service for 14 years. The units run on a 24 hour/7days a week basis. Other than normal plant maintenance, these machines have not been updated. This is a turnkey job that will include using only new original equipment manufacture parts and labor.

Ashbrook Simon-Hartley is the manufacturer and sole provider of the parts and factory trained mechanics for the Ashbrook Aqua Belt. No other sources are available to provide this service.
